Traveling Electrician

Employment Type

Electrician

Date posted

March 6, 2018

Responsibilities

Assemble, install, test, and maintain electrical or electronic wiring, equipment, appliances, apparatus, and fixtures, using hand tools and power tools.

Diagnose malfunctioning systems, apparatus, and components, using test equipment and hand tools, to locate the cause of a breakdown and correct the problem.

Connect wires to circuit breakers, transformers, or other components.

Inspect electrical systems, equipment, and components to identify hazards, defects, and the need for adjustment or repair, and to ensure compliance with codes.

Advise management on whether continued operation of equipment could be hazardous.

Test electrical systems and continuity of circuits in electrical wiring, equipment, and fixtures, using testing devices such as ohmmeters, voltmeters, and oscilloscopes, to ensure compatibility and safety of system.

Maintain current electrician's license or identification card to meet governmental regulations.

Plan layout and installation of electrical wiring, equipment and fixtures, based on job specifications and local codes.

Direct and train workers to install, maintain, or repair electrical wiring, equipment, and fixtures.

Follow safety rules and notify supervision or others when a safety hazard is observed.
